1.	Why do we insist on producing a delete confirmation screen?	1/1 point
	Because a GET request should never modify data	
	Because Django would not be able to delete the data	
	Because a POST request cannot modify data	
	○ To make sure that there are no JavaScript errors	
	⊙ Correct	
2.	Which of the following methods is called first in the Django generic list view?	1/1 point
	render_to_response()	
	setup()	
	Startup	
	O get_queryset()	
	O get()	
	⊙ Correct	
	Which method do we override in the Django generic list view to keep users from making changes to rows they don't own?	1/1 point
	render_to_response()	
	Startup	
	get_queryset()	
	O setup()	
	O get()	
	⊙ Correct	
4.	What does OwnerUpdateView do if a user tries to delete a record that does not belong to them?	1/1point
		1/1 point
	It redirects the user to www.djangoproject.org It stops and fails with an error log message	
	It puts out an error message in the JavaScript console	
	It returns a 404 (not found error)	
	It returns a 404 (not found error) Correct	
	It returns a 404 (not found error) Correct	
5.		1/1 point
5.	⊙ Correct	1/1 point
5.	⊙ Correct What template variable indicates the current logged-in user?	1/1 point
5.	 ✓ Correct What template variable indicates the current logged-in user? ● user 	1/1 point
5.	 ✓ Correct What template variable indicates the current logged-in user? ● user ✓ request.user ✓ tsugi.user ✓ myarts.owner 	1/1 point
5.	 ✓ Correct What template variable indicates the current logged-in user? ● user ✓ request.user ✓ tsugi.user 	1/1 point
5.	 ✓ Correct What template variable indicates the current logged-in user? ● user ✓ request.user ✓ tsugi.user ✓ myarts.owner 	1/1 point
5.	 ✓ Correct What template variable indicates the current logged-in user? ● user request user tsugi.user myarts.owner article.owner 	1/1 point
	 ✓ Correct What template variable indicates the current logged-in user? ● user request user tsugi user myarts.owner article.owner ✓ Correct 	
	 ✓ Correct What template variable indicates the current logged-in user? ● user request.user tsugi.user myarts.owner article.owner ✓ Correct What is the name of the model that Django uses to store User objects?	1/1 point
	 ✓ Correct What template variable indicates the current logged-in user? ● user request.user tsugi.user myarts.owner article.owner ✓ Correct What is the name of the model that Django uses to store User objects? DjangoUsers 	
	 ✓ Correct What template variable indicates the current logged-in user? ● user request.user tsugi.user myarts.owner article.owner ✓ Correct What is the name of the model that Django uses to store User objects?	
	 ✓ Correct What template variable indicates the current logged-in user? ● user request.user tsugi.user myarts.owner article.owner ✓ Correct What is the name of the model that Django uses to store User objects? ✓ DjangoUsers ✓ django.users 	
	 ✔ Correct What template variable indicates the current logged-in user? ④ user request.user tsugi.user myarts.owner article.owner ✔ Correct What is the name of the model that Django uses to store User objects? ◆ DjangoUsers → django.users → Users 	
	 ✔ Correct What template variable indicates the current logged-in user? ④ user ↑ request.user ↑ tsugi.user ♠ myarts.owner ♠ article.owner ✔ Correct What is the name of the model that Django uses to store User objects? ♠ DjangoUsers ♠ Users ♠ settings.AUTH_USER_MODEL 	
	 ✔ Correct What template variable indicates the current logged-in user? ● user ✓ request.user ✓ tsugi.user → myarts.owner → article.owner ✓ Correct What is the name of the model that Django uses to store User objects? ✓ DjangoUsers ✓ django.users ✓ Users ◆ settings.AUTH_USER_MODEL ◆ settings.USERS 	
6.	 ✓ Correct What template variable indicates the current logged-in user? ● user ─ request.user ─ tsugi.user ─ myarts.owner ─ article.owner ✓ Correct What is the name of the model that Django uses to store User objects? ─ DjangoUsers ─ django.users ─ Users ● settings.AUTH_USER_MODEL → settings.USERS ✓ Correct 	1/1 point
6.	 ✔ Correct What template variable indicates the current logged-in user? ● user ✓ request.user ✓ tsugi.user → myarts.owner → article.owner ✓ Correct What is the name of the model that Django uses to store User objects? ✓ DjangoUsers ✓ django.users ✓ Users ◆ settings.AUTH_USER_MODEL ◆ settings.USERS 	
6.	 ✔ Correct What template variable indicates the current logged-in user? ④ user request.user tsugi.user myarts.owner article.owner ✔ Correct What is the name of the model that Django uses to store User objects? ♠ DjangoUsers ← django.users Users ♠ settings.AUTH_USER_MODEL ⇒ settings.USERS ✔ Correct What is the database relationship between the Article model and User model? ♠ One-to-One 	1/1 point
6.	 ✔ Correct What template variable indicates the current logged-in user? ④ user request.user tsugi.user myarts.owner article.owner ✔ Correct What is the name of the model that Django uses to store User objects? DjangoUsers django.users Users settings.AUTH_USER_MODEL settings.USERS ✔ Correct What is the database relationship between the Article model and User model? One-to-One Zero-to-Zero 	1/1 point
6.	 ✓ Correct What template variable indicates the current logged-in user? ④ user request.user tsugi.user myarts.owner article.owner ✓ Correct What is the name of the model that Django uses to store User objects? DjangoUsers django.users Users settings.AUTH_USER_MODEL settings.USERS ✓ Correct What is the database relationship between the Article model and User model? One-to-One Zero-to-Zero Many-to-Many 	1/1 point
6.	 ✔ Correct What template variable indicates the current logged-in user? ④ user request.user tsugi.user myarts.owner article.owner ✔ Correct What is the name of the model that Django uses to store User objects? DjangoUsers django.users Users settings.AUTH_USER_MODEL settings.USERS ✔ Correct What is the database relationship between the Article model and User model? One-to-One Zero-to-Zero 	1/1 point

8. In views.py in the myarts sample code, what is the purpose of the "fields" class-wide value?	1/1 point
To list the fields that will be autosaved	
O To double-check that model fields are not missing	
To limit the model fields displayed in the form	
O To make the listed fields un-editable	
For a data model named Frog, what is the generic Edit View convention for the template used when editing a Frog object?	1 / 1 point
O frog_edit.html	
O frog_update.html	
○ frog_modify.html	
frog_form.html	
⊘ Correct	
10. In the OwnerCreateView class, what method is overridden to set the "owner" field to the current logged-in user?	1/1 point
O save(commit=False)	
form_valid()	
O LoginRequiredMixin	
O add_owner()	
○ Correct	
<u> </u>	
11. In OwnerUpdateView, how do we make sure that the current logged-in user cannot retrieve any rows that don't belong to them?	1 / 1 point
We intercept the SQL and add a WHERE clause	
We add a model filter	
O We call the method of the same name in the super class	
We retrieve all the objects and throw away the non-owned objects	
⊙ Correct	
12. In OwnerUpdateView, which is the "super" or "parent" class?	1/1 point
UpdateView	
O UpdateView::Super	
get_queryset()	
○ SuperUpdateView	
OwnerUpdateView	
⊙ Correct	
O simu	
13. When a generic edit view is receiving POST data, which of the following steps is done first?	1/1 point
O form_valid()	
O pre_post()	
get_query_set()	
© clean()	
O first_post()	
⊙ Correct
